## PROFESSIONAL SUMMARY

---

Final-year B.Tech CSE student skilled in Python, Flask, Django, and MySQL, with project experience building role-based web applications and REST APIs. Quick learner and strong team collaborator.

## TECHNICAL SKILLS

---

- Programming Language: Python
- Backend Frameworks: Flask
- Frontend (Basic): HTML, CSS, JavaScript
- Databases: MySQL (schema design, ORM)
- APIs: RESTful APIs, JSON
- Tools: Git, GitHub
- Concepts: OOP, CRUD Operations

## PROJECTS

---

### E-Governance Platform

- Built a web platform giving citizens centralized access to government applications, services, and official information
- Designed the system to let users browse, apply for, and track government services from a single portal
- Structured backend data handling for secure storage and retrieval of applications and records

### Collabspace

- Built a platform to search and connect with team members online for collaborative project work
- Implemented search and matching functionality to help users find teammates based on skills or interests
- Enabled teams to collaborate and work together in a shared online workspace

### AI Mentor

- Developed an AI-based mentor to guide students through Physics, Chemistry, and Computer Science lab practicals
- Designed interactive, step-by-step guidance to help students follow experiments and lab procedures correctly
- Aimed at improving hands-on lab learning through on-demand practical assistance

## EDUCATION

---

### Bachelor of Technology (B.Tech), Computer Science and Engineering

2023 – 2027

A.M. Reddy Memorial College of Engineering and Technology, JNTU Kakinada

### Intermediate (MPC)

2021 – 2023

Morning star junior college, Phirangipuram – BIEAP -590

### SSC (10th)

2021

St Paul's high school, Phirangipuram– SSC- 8.5

## CERTIFICATIONS

---

- Python Programming – APSCH with Datavalley
- AI Automation & Agent Engineering APSCH with Datavalley
- Web Development

## SOFT SKILLS

---

Problem-solving • Team collaboration • Time management • Quick learner
